

# ZAID ULLAH

## Junior Data Scientist

As an enthusiastic Data Science beginner, I possess a solid foundation in programming, statistics, and data manipulation. Eager to dive into real-world challenges, I am dedicated to continuous learning and excited to apply my skills to contribute meaningfully to the field of Data Science.

### KEY SKILLS

- **Programming:** Proficient in Python for data manipulation & analysis.
- **Data Manipulation:** Skilled in cleaning and pre-processing raw data.
- **Statistics and Mathematics:** Strong understanding of statistical concepts.
- **Data Visualization:** Experienced in creating visual representations of data.
- **Problem-Solving:** Effective analytical and critical thinking abilities.

### WORK EXPERIENCE

#### NTDC Limited, Lahore, PK Python Intern | July 2022–August 2022

- Gained hands-on experience in Python/Django programming.
- Learned data manipulation, data cleaning and pre-processing techniques for analysis.
- Developed teamwork and collaboration skills while working with experienced professionals.
- Gained insights into the energy industry and Python's applications in optimizing processes and extracting insights from data and applications.

#### HIST School & College Hangu, KPK, Pakistan SST | April 2017–August 2018

- Prior experience as a Computer Science teacher.
- Gained expertise in instructing and guiding students in computer science concepts.
- Developed strong communication and presentation skills.
- Fostered an environment conducive to learning and skill development.
- Provided guidance and support to students in their academic pursuits.

### EDUCATION

**KUST Kohat (2018–2022)**  
BSc (Hons) Computer Science  
A Grade

**HIST College Hangu (2016–2017)**  
FSc, Computer Science  
B Grade
